

Microsoft 365 Copilot Readiness Assessment

Prepare and empower your organisation to unlock the full potential of Microsoft Copilot

Microsoft Copilot is an AI-powered assistant designed to help users work more productively, boost efficiency, and find new growth opportunities. It is integrated with Microsoft applications, leveraging advanced AI algorithms to provide personalised suggestions, recommendations, and insights to users as they navigate through their tasks.

The tool is designed to be intuitive and easy to use, even for individuals who may not have any technical expertise or experience with AI technologies. It acts as a supportive companion, providing real-time assistance and guidance as they work. Now as it passes its first birthday, Microsoft has announced that it will be making Copilot available for organisations of any scale.

A readiness assessment is an essential step in preparing your organisation to leverage the power of Microsoft 365 Copilot. Our team of Microsoft-certified experts work with you to prepare your organisation to leverage the power of AI and realise the positive impacts to collaboration and productivity, whilst ensuring you are protected from unauthorised data leakage, inappropriate data access and other risks associated with this emerging technology.

What's involved?

Readiness Assessment

Evaluate your current Microsoft estate and ensure the correct technical prerequisites are in place for Copilot. Our thorough readiness assessment carried out by our experts will:

- Evaluate your current Microsoft 365 estate with a Microsoft 365 licensing review and tenant adoption report.
- Review your data governance.
- Ensure the technical pre-requisites for Microsoft 365 Copilot are in place.
- Give an assessment of your Microsoft 365 tenant security posture.

Workshop

Understand the art of the possible and the power of Copilot for Microsoft 365 in the context of your business, identifying challenges and opportunities through interactive and engaging workshops.

- Art of the possible presentations and demos to provide an understanding of the power of Copilot for Microsoft 365.
- Copilot technical awareness sessions, providing information on AI and Copilot features and capabilities.
- Responsible AI workshop – designed to help you responsibly use AI at every stage of innovation.
- Research your business challenges and identify opportunities to adopt AI.

Build the Plan and Implement

We'll work with you to make sure you implement Copilot effectively within your business.

- Develop a strategy for the smooth introduction and use of Copilot for your team.
- Design recommended security, data and governance controls for managing Copilot within your organisation.
- Develop a plan to implement recommendations based on prioritised scenarios.
- Define next steps and timelines to develop and implement Microsoft 365 Copilot.
